

NLP PRACTITIONER LANGUAGE & MAGIC

Format: 1) MP3 (audio), 2) PDF (transcripts of the audio)

Audience: Certified Global NLP Motivational Coaches & NLP Practitioners

Intended use: Post-NLP Practitioner Learning & Practice Aid

PRESENTED BY NICOLE SCHNEIDER, GLOBAL NLP TRAINING, 2018

Acquiring flow, creativity, and flexibility in the language used during the execution of the NLP patterns and communication tools learned in the NLP Practitioner training after the class has ended is an important thing. One cannot truly call themselves an NLP Practitioner unless one practices NLP. The training is only the beginning of the NLP journey.

To gain mastery and efficiency in the application of NLP, our students asked us for years to put a product together with the words, word combinations, sentences and sentence combinations the instructors use in our teachings and class demonstrations. We met this request and the result is this product, a new way to augment your skills in communicating with others using NLP and to give you a solid lifeline in preparing for your first NLP coaching sessions. Both the new as well as the experienced NLP Practitioner will benefit.

Note: 1) this audio series is not an NLP Practitioner training, contains no instructions or definitions. It is purely a demonstration of the language used. 2) The Meta Model & the Milton model are not covered as separate sections or lessons inside this audio product, but are integrated within many of the demonstrations.
